

Assignment - Shutter Speed - Freezing a Jump

Freezing a Jump

In this photo shoot you will take pictures in shutter priority mode (Tv). You will freeze the motion of jumping people by using a fast shutter speed.

What to do:

1. Take 10 pictures of jumping people using at least 5 different shutter speeds (starting from 1/125 sec and up)
2. Pictures need to freeze the jumping person in the air
3. You cannot be in the picture. You have to take the picture of a jumping person.
4. Create a new Google Slide show.
5. Insert the title of the assignment (Freezing a Jump) on the first slide.
6. Insert your pictures onto the next 10 slides in the correct order. Add a caption for every picture that states the shutter speed. (Example: 1/125)

Important: YOU have to take the pictures of the jumping people. You cannot upload a picture of yourself jumping.

Your pictures need to include the following:

- Pictures #1-#2: one jumping person
- Pictures #3-#4: action jump (example: karate)
- Pictures #5-6: two people jumping
- Pictures #7-#8: three people jumping
- Pictures #9-#10: any jump you want
