

# Assignment - Shutter Speed - Water Splash

---

**In this photo shoot you will take a variety of pictures that freeze the motion of water. Shoot your pictures in shutter priority mode and use a fast shutter speed.**

- You will take a total of 10 different pictures. Each picture needs to freeze a different type of water splash.
- Insert all 10 pictures into a slideshow and include the shutter speed information for each photo.

Answer the following questions on the last slide:

1. **Which of the 10 pictures do you like the most? Explain why.**
2. **Did you experience any difficulties when taking the pictures?**
3. **Explain what happened. Did you solve the problem?**
